GO GREEN STRIFE

2022-10-30

The Go Green Plan

As Go Green ideas spin in political minds, creating Go Green jobs is the #1 political narrative. With independent science not matching government science, something is wrong with this crusade to save humanity. Job creation means nothing if no one is here. Saving humanity is the part of the Go Green Plan that makes it Priority One. The Go Green Plan is supposed to save humanity from extinction. Independent scientists like David Suzuki say the "Go Green Plan" governments are implementing is more destructive to the environment than fossil fuels are, and they prove it. Politicians do not get into debates about the dark side of the Go Green Plan because they cannot defend it.

The Demise of Humanity

Governments disregarding the public is nothing new. COVID came along, and people suddenly had time to think. We live in this time of Biblical history. The story of our time is a story holding humanity's existence in the balance. If we lose this "Go Green" battle, we all lose. This is the basis of the government's argument for the Go Green Plan. Our story needs to be told to every generation if we are to survive this onslaught of dishonesty emanating from government policies that are prevalent upfront and growing bigger by the day as the public becomes more aware, especially when discussing the Go Green Plan and the Demise of Humanity

Is Humanity's existence in the hands of Corrupt Governments?

Is humanity's existence being used to disregard life for profit?

Are the fundamentals of human existence being denied?

Big Tech takes money from the government to execute political narratives. Everything Big Tech and the government want, they get as they lay waste to anyone who gets in their way. We are talking about the Demise of Humanity, prevalent and undeniably Big Tech and the Government did not help humanity in its time of covid, they, along with Big Pharma, monopolised covid for monetary and political advantages by not exploring covid alternatives, as they silenced people that could have helped. In such a crisis, all useful sources need to be available for scrutiny by the public, government, and big corporations. Governments, Big Pharma, and Big Tech hid life-saving covid tools from the public and guarded their secrets from becoming general public knowledge. IVERMECTIN is one such tool that saves lives and was hidden. Many proven facts are hidden, such as what is in the covid vaccines and what the covid vaccines do to people is also hidden. Because such prevalent questions are disturbingly common It makes one no longer supportive of the digital age. How can anyone support the digital age if they are blatantly lying to the public? Big Tech, the Government, and Big Pharma supported the digital persecution of society. For a more civilized world, digital transparency is society's only hope for keeping such tyrannical people from such powers. Is it too late, Is it the end of humanity or the end of democracy?

Go Green Mystery

Is hydrogen being left behind in order to proselytize the go green sector?

If there is any truth to Global Warming and the Demise of Humanity, if there is any truth of this, why not include hydrogen? By not helping humanity out of the global warming crisis with the cleanest of the clean, costing pennies to the dollar, hydrogen, there cannot be a crisis without hydrogen in the mix. What happened to the good old days when such a crisis automatically included humanity's needs without tyrannical inclusions? Tools for government reform to combat tyranny are needed for society to know they rule society's destiny and not the ones elected who cover their paths in a digital maze that includes Big corporations, such as our government, are playing God with society as we kiss our freedoms goodbye one by one, most people are without knowing and march straight ahead.
